

- Elevate customer experience
- Improve performance and quality
- Leverage predictive analytics
- Increase labour efficiency
- Reduce costs and waste

Introducing **smart technology** that takes **washroom and facility maintenance** to a whole new level.

WandaNEXT™ provides real time, actionable data that enables facility managers to solve problems BEFORE they become customer or tenant complaints.

Replace antiquated, paper-based washroom cleaning records with WandaNEXT™, the intelligent washroom monitoring device that creates a next-level customer experience.

The interactive WandaNEXT™ commercial grade tablet enables washroom patrons to identify areas that need attention and cleaning teams to report on cleaning activities and supply replenishment.

WandaNEXT™ records and analyzes data to deliver critical insights for more proactive and efficient facility maintenance. Its robust analytics engine empowers facility managers to set replenishment thresholds, response time standards, traffic-based cleaning schedules and more.

Increase Quality

The WandaNEXT™ analytics dashboard highlights areas of concern, how quickly staff respond to customer alerts, and how that performance compares to previous days, weeks, months, or years. That means you can implement better cleaning practices, improved scheduling, and faster response times to customer concerns.

Reduce Risk

Detailed reporting provides audit capability so you can validate that cleaning standards and timing in your facilities meet all public health and safety requirements.

Make an Impression

Perception is everything. By installing WandaNEXT™, you demonstrate care and commitment to ensuring your facilities are clean and maintained to the highest standard.

Optimize Performance and Efficiency

Cleaning staff required to enter duties performed and supplies used into WandaNEXT™ develop greater accountability. Satisfaction data associated with task completion enables you to manage staff performance, focus training on specific improvement areas and refine cleaning schedules.

Reduce Cost and Waste

WandaNEXT™ provides vital insights into traffic patterns, cleaning task time requirements and supply use, which enable you to improve quality, efficiency and labour utilization. As a result, you can reduce or better manage both costs and waste.

Product Features

- WandaNEXT™ is a complete solution containing software, hardware and mounting units, with optional people-counting sensors.
- The WandaNEXT™ touchscreen has a silver ion-infused, antimicrobial overlay that will not harbour bacteria.
- The 15 inch touchscreen provides dedicated space for advertising, public service announcements or branding.
- Traffic-based alert settings and auto-replenishment notifications enable facility managers to proactively address issues before they become tenant or customer complaints.

WandaNEXT™ can be connected to your facility's network, or via Wi-Fi or cellular. The system offers optional people counting units for traffic reporting and generates usage-based service alerts.

Where's WandaNEXT™?

Airports and High-traffic Venues

Let clean, well-maintained facilities and your commitment to customer experience be the first thing travelers and visitors see when they fly into your city or attend meetings at your conference centre. WandaNEXT™ can be installed in any area requiring cleaning, from washrooms to baggage handling and waiting areas.

Commercial Buildings

Maximize tenant satisfaction and building occupancy levels by demonstrating the highest standards of quality for washroom maintenance and cleanliness. Washroom cleanliness is one of the leading contributors to employee satisfaction in the work environment, and that translates into satisfied tenants and longer lease term commitments.

Shopping Centres and Retailers

Improve and enhance customer experience, elevate perception and promote longer and more frequent visits to shopping malls and large retail stores. That not only generates higher sales per customer visit, but creates positive word of mouth and attracts new customers.

Hospitals

Minimize the spread of infection and ensure adherence to legislated public health requirements. WandaNEXT™ is ideal for healthcare settings to ensure washrooms are continually cleaned and sanitized as needed, and according to required schedules

A University research study confirmed that installing WandaNEXT™ in certain public washrooms resulted in those washrooms being perceived as being significantly cleaner than washrooms without the system in place*.
